

I just recently subscribed to XMRADIO. The one thing I really love about it is the Weather and news channels. When your in a car and would like to here weather or important news reports. That is something radio itself do not put out when in an important time. Least you can depend on XMRADIOturn to there and there it is no commercials, no singing....and so on. We already pay for it monthly. That sort of information should be free anyway!!! Same happened with Direct TV...I have to pay for my local channels. Just to hear my local news. Thats important to me to know when to be prepared for a storm or whatever. Thats my comment...Is leave XM alone!
